

Seungjun Lee

Computer Science and Engineering Student | Seoul National University
Email: your-email@snu.ac.kr | GitHub: github.com/stevelee0817

Education

Seoul National University - B.S. in Computer Science and Engineering

2025 - Present

Skills

Programming	Python, Java, C/C++
Web & Tools	HTML, CSS, Git, GitHub Pages, VS Code, Codex, Notion
Interests	Algorithms, web development, artificial intelligence, human-computer interaction

Experience & Activities

Student Council President, Department of Computer Science and Engineering

Seoul National University

- Organized student events and academic support programs for CSE students.
- Worked to improve communication between students, faculty, and the department.

Education and Career Affairs, Student Executive Committee

Seoul National University

- Participated in planning academic and career-related programs for students.
- Contributed to student policy discussions and proposal writing.

Mentor, Freshman Programs

Seoul National University

- Supported new students in adapting to university life and academic environments.
- Helped organize mentoring activities and orientation-related programs.

Projects

Personal Website with GitHub Pages

- Built a static personal website using HTML, CSS, Git, and GitHub Pages.
- Used an AI coding agent to generate and improve the website structure.

Algorithm Problem Solving

- Practiced algorithmic problem solving using Python.
- Studied BFS, dynamic programming, priority queues, and implementation problems.

Courses

Selected coursework includes programming, computer science fundamentals, logic design, and general education courses related to humanities and technology.

Profile

I am interested in the relationship between technology, society, and human decision-making. As a Computer Science and Engineering student, I want to explore how software, artificial intelligence, and digital systems can be designed in responsible and meaningful ways.
